Forecast for Friday 07 Jun 2024

Weather: A cloudy but dry start during the early hours with outbreaks of showery rain arriving in the morning. This clears slowly to the southeast through the late morning with sunny spells and largely dry conditions following behind. Clouding over in the west of the park during the evening, with brighter spells further east.

Chance of cloud-free hill tops above 600m: 40% becoming 70% then lowering to 40% in the west.

Low cloud and visibility: Broken cloud obscuring hills above 400-500m with outbreaks of rain lowering the visibility to poor, as the rain clears visibilities improve to very good and the cloud bases gradually break and lift above the summits by the afternoon, before filling and lowering again in the west during the evening.

Meteorologist's View

Feeling rather cool for the time of year, especially on summits where temperatures are exacerbated by breezy conditions.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Wed 05 Jun 2024	3.2mm	3.6mm	3.6mm

Forecast for Saturday 08 Jun 2024

Weather: A band of heavy showers clears southeast in the morning followed by a good deal of sunshine. Staying mostly dry in the afternoon. Feeling cold on summits but with high UV levels sun protection is advised.

Maximum wind: Northwesterly 15-20mph gusts 25-30mph.

Chance of cloud-free hill tops above 600m: 30% in the morning becoming greater than 95%.

Low cloud and visibility: Scattered to broken amounts of cloud 400-500m as a band of showers passes in the morning with visibilities falling to moderate or poor. Once cleared, cloud bases quickly lift and break with bases well above summits. Visibility improving to very good.

Temperature: **Valleys:** Plus 11 Celsius becoming 15 Celsius.
At 600m: Plus 5 Celsius becoming Plus 8 Celsius.
Freezing level: Above summits.
